DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 28 February 2005 has been entered. Previously allowed claims 2, 8-9, 11-15, 17-18, 21-22, 24-31 are currently pending.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on 28 February 2005 was filed after the mailing date of the Notice of Allowance on 30 November 2004. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Reasons For Allowance

The following is an examiner's statement of reasons for allowance:

The instant application is deemed to be directed to a nonobvious improvement over the newly submitted references patented in IDS references (Azima, WO 97/09842; Waltz et al, 5,902,004).

The Azima reference teaches several hinged door leaf structures (figs. 29-40; pages 70-75) utilizing a single transducer configuration. It does not teach a single embodiment

Art Unit: 2646

incorporating a door leaf structure comprising a first transducer; and a second transducer mounted in a second space between the front and rear cover panels for driving the rear parallel cover panel to resonance, wherein the first and second transducers are separated by a damping element, as substantially connected and described with the other functional language as claimed.

Furthermore, the Waltz reference teaches an automotive hinge door with a door leaf (fig. 1) utilizing a single transducer (53) emitting sound forward through the door leaf (mounting plate, 3). It does not teach a single embodiment incorporating the door leaf comprising a first transducer; and a second transducer mounted in a second space between the front and rear cover panels for driving the rear parallel cover panel to resonance, wherein the first and second transducers are separated by a damping element, as substantially connected and described with the other functional language as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
